

MALLA REDDY COLLEGE OF ENGINEERING

REPORT ON ENGINEER'S DAY CELEBRATION

“Scientists investigate that which already is; Engineers create that which has never been.”

- Albert Einstein

Engineers are shaping the future by applying their skills to almost everything. They convert the theoretical knowledge of basic sciences into actual products and thus make our lives easy. Engineers possess versatile minds and help in filling the gap between science, technology and the community. Engineers in India contribute greatly to the nation's technological and industrial growth. There really is no limit to what engineers can do.

Engineers' Day is celebrated on September 15 every year in India commemorating the birthday of one of the greatest engineers in India and Bharat Ratna recipient, Sir Mokshagundam Visvesvaraya garu, recognizing his contributions in harnessing water resources in India. He had successfully designed and constructed several river dams, bridges and revolutionized the irrigation system all over India.

We @ **MRCE** celebrated Engineer's Day on 15th September 2023 in honor of Dr. M Visvesvaraya, a true gem of India and to identify the great works done by our hard working engineers each year. The main objective of the event was to encourage self evaluation, motivation, effective communication and team building among the students. In accordance with program that **MRCE and ESCI-HYD** had a **MOU** on this occasion by consent of both colleges. Benefits with MOU for staff and students to improve their skills, training in specific domain, Faculty Development programs and many more under one roof.

Dr. M.ASHOK Sir, Principal, MRCE addressed the students on this special day; we remember the hard work and determination of countless engineers across the world and across the ages. We pay our respects to them for their immense contributions and for making the unimaginable a reality and this isn't limited to just physical structures or devices. Engineers also shape ideas, create systems, and build innovative solutions to some of our society's most complex problems. And no better instance of this than Sir M.Visvesvaraya garu the genius behind a network of dams in our country that revolutionized irrigation and water management. His birthday serves as beacon to celebrate this pivotal event. Sir M.Visvesvaraya's vision, persistence and his urge for perfection reflects what engineering truly stands for – finding practical solutions for complex problems for the betterment of humanity.

Mr. N.Sudhir Reddy Sir, Director, MRCE addressed the students and advised them to take Dr M Visvesvarayyagaru as their role model, be confident in their mission and sharpen their skills to meet the global industrial demands.

Dr.G.RAMESHWAR RAO, Director, ESIC-HYD Chief Guest addressed Engineers are the building blocks of our society. Every Monument, every road, every innovation that has shaped our modern world stands as testament to the relentless minds of engineers. Whether it's the bridges that connect our cities, the satellites that orbit our planet, or the tiny microprocessor that powers your smartphones, all these are significant achievements of engineering that have, in essence, reduced distances, increased efficiency, and made our lives easier.

College organized a Poster Competition at individual level followed by group activity to inculcate competitive spirit among the budding engineers.

More than 250 students participated in this event.

The initiative taken by Mechanical and Electronics and Communications Engineering Departments at MRCE was highly appreciated by all the staff members and the students. It was an open opportunity to all the students to showcase their talents. Students with the remarkable performances were awarded with attractive gifts.

“To the optimist, the glass is half full. To the pessimist, the glass is half empty. To the engineer, the glass is twice as big as it needs to be.”
