ABOUT SEMINAR:

Entrepreneurship and innovation are increasingly important in all areas of business and government. Entrepreneurial start-ups galvanize the economy by identifying new opportunities and redirecting resources to them.

Established firms innovate in order to outmaneuver or respond to their competition. And in the public sector, the need for effective policies to deal with new challenges and for increasing service delivery with declining budgets also places a premium on innovative thinking.

The seminar focuses on the skills necessary for the planning, development and launch of entrepreneurial and innovative ventures.

ABOUT SEMINAR:

Entrepreneurship and innovation are increasingly important in all areas of business and government. Entrepreneurial start-ups galvanize the economy by identifying new opportunities and redirecting resources to them.

Established firms innovate in order to outmaneuver or respond to their competition. And in the public sector, the need for effective policies to deal with new challenges and for increasing service delivery with declining budgets also places a premium on innovative thinking.

The seminar focuses on the skills necessary for the planning, development and launch of entrepreneurial and innovative ventures.
