**Event Report:** NSS Awareness Program on Save Water & Save Power 2025.

**Date:** April 25, 2025

**Organized by:** NSS Unit, Malla Reddy College of Engineering (MRCE)

**Venue:** Seminar Hall, MRCE Campus

**Number of Participants:** 100+ NSS Volunteers

## Introduction

The National Service Scheme (NSS) unit of our college organized an awareness program titled "Save Water & Save Power" on April 25, 2025. The event aimed to educate students, faculty, and dignitaries about the importance of conserving water and electricity, two vital resources essential for sustainable living. The program emphasized individual responsibility and collective action to address the growing challenges of resource depletion and environmental degradation.

## Participants

- **Principal:** Dr. M. Ashok
- NSS PO : G Ratnakumar
- Dean's & Heads of Departments (HODs)
- NSS Volunteers and Coordinators

## Event Details

### Inauguration Ceremony (2:00 PM)

The program began with a ceremonial ribbon-cutting, marking the official commencement of the event. Dr. M. Ashok, the Principal, along with NSS PO G Ratnakumar, Deans and Heads of Departments, graced the occasion by cutting the ribbon together. This symbolic act not only set the tone for the day's activities but also underscored the importance of collective leadership in driving awareness about critical issues like water and electricity conservation. The dignitaries' presence and participation reflected their commitment to fostering a culture of sustainability within the college community. The ceremony served as a reminder that every individual, regardless of their role, has a part to play in conserving our planet's finite resources.

### Paper Poster Exhibition and Evaluation

Following the inauguration, attendees were invited to view an exhibition of posters created by NSS volunteers and students. These posters were a testament to the creativity and dedication of young minds striving to make a difference. Each poster conveyed powerful messages about conserving water and electricity, offering innovative solutions and actionable steps that could be easily adopted in daily life.

The dignitaries took time to evaluate the posters, engaging with the creators to understand their ideas and applauding their efforts. The posters highlighted diverse themes, such as the impact of wastage on the environment, the importance of sustainable practices, and the role of technology in conservation. The exhibition not only educated the participants but also inspired them to think critically about their own habits and how they could contribute to a greener future.

The dignitaries praised the students for their ingenuity and encouraged them to continue spreading awareness through such creative mediums. This segment of the program reinforced the idea that art and education can go hand-in-hand to drive meaningful change.

### Speeches on Awareness

The seminar hall buzzed with anticipation as insightful speeches were delivered by NSS students and faculty members. The highlight of this session was a compelling speech by T. Yashwanth, an NSS volunteer, who spoke passionately on the topic **"Save Water and Save Electricity."**

T. Yashwanth began his address with a thought-provoking quote: *"We never know the worth of water till the well is dry."* – Thomas Fuller. He then expanded on the theme, emphasizing that water and electricity are finite resources that are often taken for granted. Through vivid imagery and relatable examples, he urged the audience to adopt simple yet impactful habits, such as turning off taps while brushing, fixing leaks promptly, and switching off lights when leaving a room. His words resonated deeply with the audience, inspiring them to reflect on their own behaviours and recognize their role in conserving these vital resources.

The dignitaries followed with their perspectives, reinforcing the message of sustainability. The Principal, Vice Principal, and Heads of Departments shared their insights on the urgency of addressing resource depletion. They stressed that saving water and electricity is not merely an individual duty but a collective responsibility that requires collaboration across all levels of society. Their speeches were both motivational and instructional, encouraging everyone present to take ownership of their actions and become ambassadors of change within their communities.

This segment of the program left a lasting impression, reminding attendees that small actions, when multiplied by millions, can lead to transformative outcomes.

## Pledge Ceremony

A solemn pledge ceremony was conducted to solidify the participants' commitment to conserving water and electricity. The pledge was read aloud, and each participant repeated it with conviction, promising to adopt sustainable practices in their daily lives.

The pledge included commitments such as turning off taps while brushing teeth, fixing leaks promptly, using energy-efficient appliances, and spreading awareness among family and friends. This symbolic act united everyone in their shared goal of creating a sustainable future. It served as a powerful reminder that individual actions, no matter how small, can collectively make a significant impact.

The atmosphere during the pledge ceremony was one of unity and determination. Participants left the session feeling empowered and motivated to uphold their promises, knowing that their efforts would contribute to preserving the planet for future generations.

## Interactive Activity: Symbolic Representation

To reinforce the message of conservation, an engaging and symbolic activity was organized outdoors. Blue and white balloons were scattered across the floor, representing wasted water and electricity. Participants, including the dignitaries, were invited to collect these balloons and place them into a bucket, symbolizing the act of saving these precious resources.

This hands-on activity provided a tangible and visual representation of the impact of collective action. As the balloons were gathered and placed into the bucket, participants were reminded that every small effort counts and that working together can lead to meaningful change.

The activity was met with enthusiasm and active participation from all attendees. It served as a powerful metaphor for the importance of collaboration and responsibility in addressing environmental challenges. By the end of the activity, the message was clear: just as the balloons were collected and saved, so too must we work together to conserve water and electricity in our daily lives.

## Follow-Up Awareness Campaign in Classes

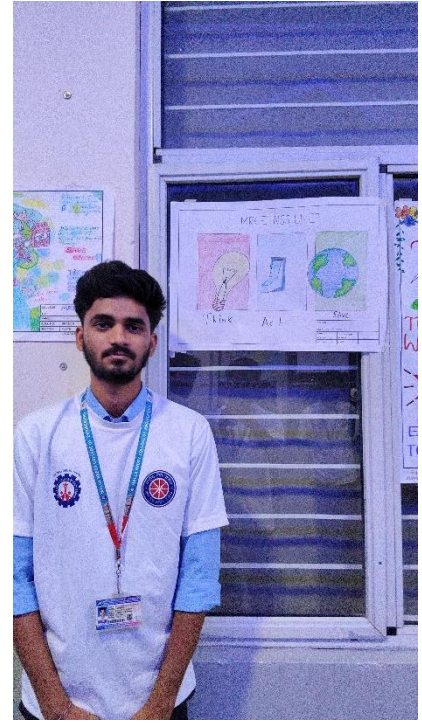

The impact of the "Save Water & Save Power" program extended beyond April 25, 2025. The next day, NSS coordinators visited classrooms across the campus to reinforce the message of conserving water and electricity. This ensured that every student was reached, leaving no one behind in the collective effort toward sustainability.

Equipped with posters, pamphlets, and presentations, the coordinators conducted brief yet impactful sessions. They revisited key takeaways from the event, emphasizing simple habits like turning off taps while brushing, switching off lights and fans when not in use, and fixing leaks promptly. Actionable steps tailored to daily routines—such as using energy-efficient appliances and reusing RO reject water—were also highlighted.

## Conclusion

The NSS Awareness Program on "*Save Water & Save Power*" was a resounding success. It not only educated participants about the importance of conserving water and electricity but also inspired them to take actionable steps in their daily lives. The speeches, interactive activities, and symbolic gestures left a lasting impression on everyone present.

As stewards of the environment, it is our responsibility to ensure that future generations inherit a world rich in resources. By adopting simple habits and spreading awareness, we can collectively create a sustainable future.

Together, we can save water, save power, and save our planet. The event concluded with a vote of thanks by the NSS coordinator, expressing gratitude to all participants, dignitaries, and volunteers for their active involvement and contributions to making the program a success.
