Hyderabad.

Respected Sir,

Sub: Request for the permission to conduct one-day online physics FDP program-reg.

We, the faculty of physics from H.&S. Dept. would like to conduct one-day online FDP program on the topic "Current trends in Energy Materials and their applications" on 30th May, 2024 .

Hence, we request you to permit us to conduct the above said program.

Thanking you ,

Regards,
Convener
Dr. Sneha Joshi
Head, H.&S Dept.

About MRCE:

Malla Reddy College of Engineering the jewel in the crown of Malla Reddy Group of Institutions (MRGI) was established in the year 2005 with the approval from AICTE, permanent affiliation to JNTUH, accredited by NBA & NAAC. The college is located at Maisammaguda, Dhulapally, Secunderabad, Telangana, India.

The institute offers B.Tech courses in Computer Science & Engineering, CSE(Data Science), CSE(Artificial intelligence & Machine Learning) and ECE branches. Malla Reddy College of Engineering has been laid upon a very strong foundation and has ever since been excelling in every aspect. The bricks of this able institute are certainly the adept management, the experienced faculty, the selfless non-teaching staff and of course the students.

Vision of Institute :

To emerge as a Center of Excellence for producing professionals who shall be the leaders in technology innovation, entrepreneurship, management and in turn contribute for advancement of society and humankind.

Mission of Institute :

To provide an environment of learning in emerging technologies.

To nurture a state of art teaching learning process and R&D culture.

To foster networking with Alumni, Industry, Institutes of repute and other stakeholders for effective interaction.

To practice and promote high standards of ethical values through societal commitment.

About the Department of Humanities & Sciences (MRCE):

The Department of Humanities and Sciences (H&S) is one of the earliest Departments at MRCE established in the year 2005. The Department of Humanities and Sciences (H&S) offers basic Engineering Mathematics, Physics, Chemistry and English among others subjects for U.G students of all B. Tech courses at first year level. The Department of H&S aims at encouraging advanced teaching learning process and quality research at individual, department, and institutional level.

It also persistently strives to build quality-based knowledge and human resource capacity, to conduct academic programs every time and again in the emerging areas of engineering and technology.

The Department of H&S is continuously working to provide a foundation for engineering studies and communication skills. We have well experienced and qualified Faculty members as per the AICTE, Delhi and JNTU, Hyderabad requirements.

Vision of the Department :

The department aims to become a pioneer in the field of education and training in Humanities and Sciences with enriching value-added education.

Mission of the Department :

Department strives to transform its students into Confident, Professionally Sound and Socially Responsible Engineers who can meet the challenges of advancing technology and work for the betterment of mankind.

Objective of this FDP:

The objectives of the faculty development program "Current Trends in Materials and their Applications" are to acquaint faculty with the latest materials advancements and their applications across industries, while also enhancing teaching methodologies to integrate these trends effectively into the curriculum.

Additionally, the program aims to foster interdisciplinary research collaborations and industry partnerships, empowering faculty to inspire student engagement and pursue professional development in materials science and engineering.

Program Schedule:

Date: 30/05/2024

Day: Thursday

Time: 10:30AM to 12:30 Noon

Resource Person:

Prof. Balaji R Ravuri

Head, Department of Nanoscience and Materials, Central University of Jammu, India.

Topic: Materials for Hydrogen storage

Chief Patron:

One Day Online National Level Physics Faculty Development Program on "Current Trends in Materials and their Applications" Organized by Department of Humanities & Sciences(Physics)

Day wise Report with photos:

Date: 30-05-2024

The Faculty Development Programme on "Current Trends in Materials and Their Applications" featured an insightful presentation by Prof. Balaji Ravuri on "Materials for Hydrogen Storage."

The session began with an important context provided by the Indian government's Atmanirbhar Bharat initiative, emphasizing the need for energy self-reliance.

Balaji Rao (Presenting)

An Introduction to Hydrogen as Energy Carrier

- Hydrogen is the lightest and most abundant element in the universe (~75%)
- Only a tiny portion of the earth is comprised of hydrogen gas
- At 25°C and 1 atm pressure, hydrogen is a colorless, odorless, tasteless, non-toxic, non-metallic, highly combustible diatomic gas with the molecular formula H₂
- Most of the hydrogen on earth exists in molecular forms such as water or organic compounds

Physical Properties of Hydrogen

Density (0° C, 1 atm)	0.08988 g/L
Melting point	14.01 K, 259.14 °C
Boiling point	20.28 K, 252.87 °C
Specific heat	14.304 J/g K
Calorific Value	141 MJ/kg

Calorific value of petrol is 46.4 MJ/Kg, Diesel is 45.6 MJ/kg and Natural gas is 52.2 MJ/Kg

Prof. Ravuri highlighted that by focusing on energy storage solutions like hydrogen, we can significantly reduce transportation costs by up to 20%, ultimately benefiting the common people.

Prof. Ravuri explained the fundamental properties of hydrogen that make it an ideal energy source. Hydrogen is clean, safe, lightweight, and eco-friendly. These characteristics make it a promising alternative to traditional fossil fuels, contributing to a sustainable energy future.

The presentation detailed the National Green Hydrogen Mission, an ambitious initiative aimed at making India a global hub for hydrogen production. Prof. Ravuri discussed how this mission is expected to lead to significant decarbonization of various sectors, aligning with global efforts to combat climate change.

Prof. Ravuri also touched upon the wide range of applications for hydrogen storage materials, from transportation to industrial processes. He highlighted ongoing research and development efforts aimed at improving the performance and reducing the cost of these materials. The future prospects for hydrogen storage are bright, with potential breakthroughs expected to drive the widespread adoption of hydrogen as a key energy resource.

Conclusion: The session concluded with a discussion on how advancements in hydrogen storage materials can contribute to the broader goals of Atmanirbhar Bharat and the National Green Hydrogen Mission. By embracing these innovations, India can achieve energy independence, reduce carbon emissions, and create a sustainable future.

HOD H&S

Prof. Balaji R Ravuri

Head, Department of Nanoscience and Materials, Central University of Jammu, India.

BRIEF PROFILE OF PROF. BALAJI RAO RAVURI

Dr. BALAJI RAO RAVURI focuses his research expertise on inexpensive materials for sodium-ion batteries, including advanced electrode material synthesis, pouch cell design and assembly for EVs/HEVs, and Hydrogen storage using High entropy materials.

He authored more than 60 articles in high-impact journals with H-index 13, and three patents. He received financial support from various international and national funding agencies such as NSF (USA), NRB, DRDO, BRNS, DAE, GITAM, and the Crystallographic Society of India.

As a Visiting Researcher, he visited Georgia Institute of Technology, USA, CNRS laboratories, France, and KMITL University, Thailand. Contributions towards research and teaching recognized as a fellow of “The National Academy of Science” and recipient of the “Best Researcher Award.”

He supervised 8 Ph. D. theses, and 14 PG project dissertations. He serves on the Editorial Board of several international journals published by ACS, Wiley, Elsevier, Springer, Taylor and Francis, etc.

He is a life member of the National Science Congress, the Indian Physics Teachers Association, the Rare Earth Association of India, Society for Materials Chemistry (DAE) etc.

OUTCOME OF THE FDP PROGRAMME

Date: 30th May 2024

Topic: Materials for Hydrogen Storage

Presenter: Prof. Balaji Ravuri

Introduction: The Faculty Development Programme on "Current Trends in Materials and Their Applications" featured an insightful presentation by Prof. Balaji Ravuri on "Materials for Hydrogen Storage." The session began with an important context provided by the Indian government's Atmanirbhar Bharat initiative, emphasizing the need for energy self-reliance. Prof. Ravuri highlighted that by focusing on energy storage solutions like hydrogen, we can significantly reduce transportation costs by up to 20%, ultimately benefiting the common people.

Key Points Learned:

1. Why Hydrogen?

- Prof. Ravuri explained the fundamental properties of hydrogen that make it an ideal energy source. Hydrogen is clean, safe, lightweight, and eco-friendly. These characteristics make it a promising alternative to traditional fossil fuels, contributing to a sustainable energy future.

2. National Green Hydrogen Mission:

- The presentation detailed the National Green Hydrogen Mission, an ambitious initiative aimed at making India a global hub for hydrogen production. Prof. Ravuri discussed how this mission is expected to lead to significant decarbonization of various sectors, aligning with global efforts to combat climate change.

3. Hydrogen as an Energy Carrier:

- Hydrogen's role as an energy carrier was emphasized. Unlike other energy sources, hydrogen can store and deliver energy efficiently. Prof. Ravuri explained how hydrogen can be produced from renewable sources and used in fuel cells to generate electricity, making it a versatile and sustainable energy carrier.

4. Materials for Hydrogen Storage:

- The core of the presentation focused on the materials used for hydrogen storage. Prof. Ravuri discussed various advanced materials, such as metal hydrides, carbon-based materials, and complex chemical hydrides, that have shown promise in effectively storing hydrogen. These materials are crucial for the safe and efficient storage and transportation of hydrogen.

5. Applications and Future Prospects:

- Prof. Ravuri also touched upon the wide range of applications for hydrogen storage materials, from transportation to industrial processes. He highlighted ongoing research and development efforts aimed at improving the performance and reducing the cost of these materials. The future prospects for hydrogen storage are bright, with potential breakthroughs expected to drive the widespread adoption of hydrogen as a key energy resource.

Conclusion: The session concluded with a discussion on how advancements in hydrogen storage materials can contribute to the broader goals of Atmanirbhar Bharat and the National Green Hydrogen Mission. By embracing these innovations, India can achieve energy independence, reduce carbon emissions, and create a sustainable future.
