**ORGANIZED BY DEPARTMENT OF HUMANITIES AND SCIENCES
(MATHEMATICS)**

MALLA REDDY COLLEGE OF ENGINEERING, HYDERABAD

Date: 24-07-2025 | Time: 10:00am -12:00pm | Thursday

Introduction

The Faculty Development Program (FDP) titled “MATLAB Programming - A Primer” was conducted on 24th July 2025, with the objective of empowering faculty members from diverse institutions with cutting-edge technologies. The program was organized in a virtual format, thereby ensuring accessibility for educators across India.

Event Details

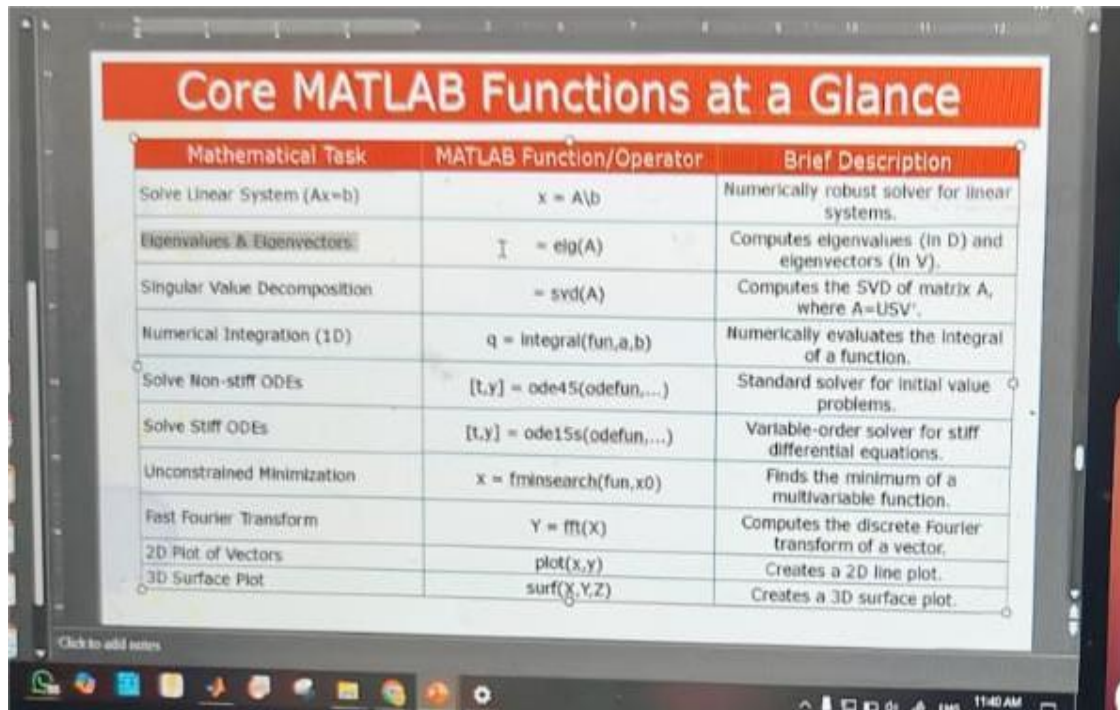

The session was held from 10:00 AM to 12:00 PM and witnessed the participation of 200 faculty members from diverse states in India, including Telangana, Andhra Pradesh, Tamil Nādu, Karnataka, and Uttar Pradesh.

Resource Person

Dr. E.Vargil Kumar serves as an Associate Professor at SR Gudlavalleru Engineering College. He obtained his Ph.D. from IIT Delhi, specializing in the domain of power electronics. His research interests encompass Isolated DC grids and Hybrid DC converters. With over two decades of pedagogical experience, he has authored approximately 50 scholarly articles in esteemed national and international journals.

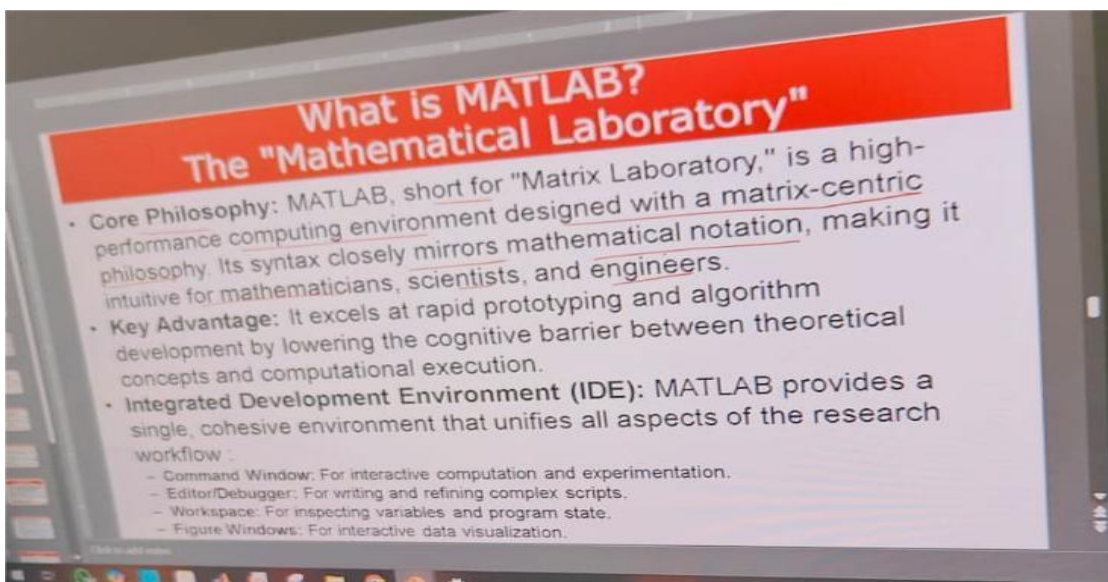

Objectives : To equip educators with the skills to integrate MATLAB into their teaching and research, enhancing their ability to teach computational skills, analyze scientific phenomena, and develop innovative methods.

Mathematical Task	MATLAB Function/Operator	Brief Description
Solve Linear System ($Ax=b$)	$x = A \backslash b$	Numerically robust solver for linear systems.
Eigenvalues & Eigenvectors	$[D, V] = \text{eig}(A)$	Computes eigenvalues (in D) and eigenvectors (in V).
Singular Value Decomposition	$[U, S, V] = \text{svd}(A)$	Computes the SVD of matrix A , where $A=USV'$.
Numerical Integration (1D)	$q = \text{integral}(\text{fun}, a, b)$	Numerically evaluates the integral of a function.
Solve Non-stiff ODEs	$[t, y] = \text{ode45}(\text{odefun}, \dots)$	Standard solver for initial value problems.
Solve Stiff ODEs	$[t, y] = \text{ode15s}(\text{odefun}, \dots)$	Variable-order solver for stiff differential equations.
Unconstrained Minimization	$x = \text{fminsearch}(\text{fun}, x_0)$	Finds the minimum of a multivariable function.
Fast Fourier Transform	$Y = \text{fft}(X)$	Computes the discrete Fourier transform of a vector.
2D Plot of Vectors	$\text{plot}(x, y)$	Creates a 2D line plot.
3D Surface Plot	$\text{surf}(X, Y, Z)$	Creates a 3D surface plot.

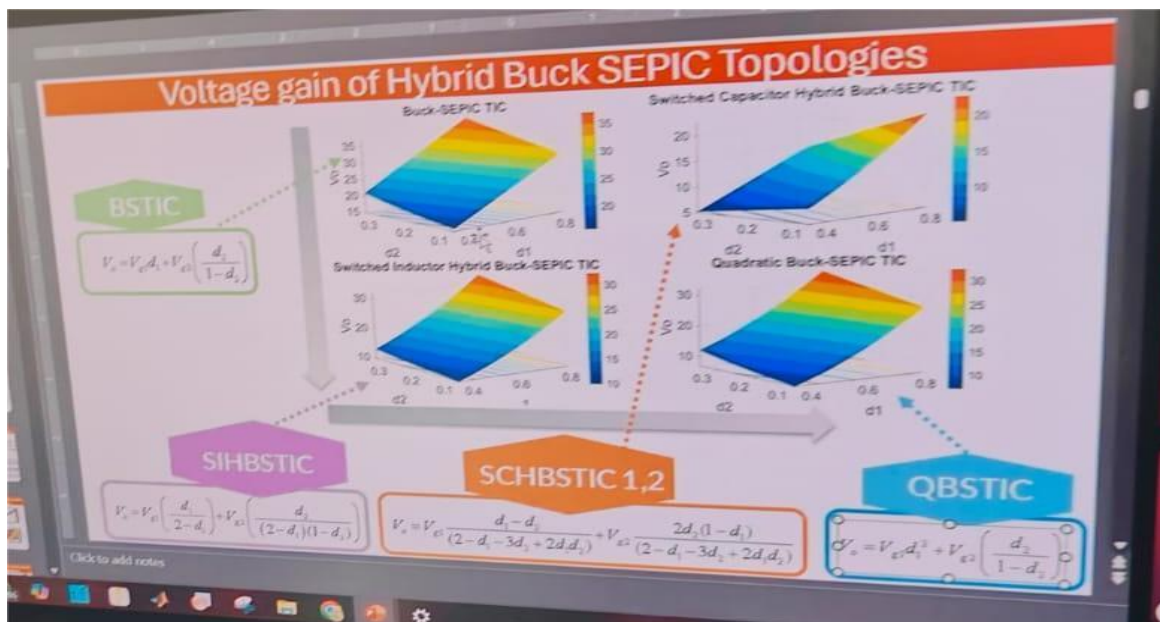

FDP Content Overview

Dr.E.Vargil kumar presentation focused on “MATLAB Programming -A Primer”

Applications Across Mathematical Disciplines

- **Numerical & Applied Linear Algebra:** MATLAB's native domain. Excels at solving linear systems, eigenvalue problems, and matrix decompositions like SVD for applications like image compression.
- **Calculus & Differential Equations:** Features a suite of robust ODE solvers (ode45, ode15s) for modeling dynamical system models. Includes a solver (pdepe) for 1D partial differential equations.
- **Statistics & Stochastic Modeling:** Provides a solid foundation for data analysis, probability distributions, and hypothesis testing. Its random number generation is ideal for Monte Carlo simulations.
- **Optimization & Operations Research:** Includes foundational solvers for finding minima/maxima of functions, with or without constraints (fminsearch, fmincon).

The Converging Frontiers & Future Trends

The lines between pure, applied, and computational math are blurring, leading to exciting new frontiers.

- **The Interdependent Phase:** Theory provides the language, problems provide the motivation, and computation provides the power.
- **Future Trends:**
 - **AI-Driven Mathematics:** Using machine learning to discover new conjectures and assist in proofs.
 - **Rise of Interdisciplinary Fields:** Growth in areas like computational biology and data science that require hybrid mathematical and computational skills.
 - **The "Digital Twin":** Creating a complete, real-time virtual model of a physical system (e.g., a human heart) for ultimate analysis and prediction.

Final Conclusion

- The old divisions are giving way to a more integrated vision of mathematics.
- The future of discovery lies in the **creative synthesis** of abstract theory, practical application, and computational power.
- The 21st-century mathematician is increasingly a **polymath**: a theorist, a modeler, and a computational scientist, fluent in the languages of proof, application, and algorithm.

Key Takeaways

Focus on Technical Computing: MATLAB is optimized for solving problems in engineering and scientific domains, integrating computation, visualization, and programming.

Matrix-Based Language: The core of MATLAB is its matrix-based language, which provides a natural way to express computational mathematics and allows for operations on entire matrices and arrays.

Ease of Use and Visualization: MATLAB simplifies the process of solving complex problems by offering intuitive ways to express mathematical concepts and generating visualizations for data insights.

Efficient Program Development: The primer guides users to write efficient and compact programs for specific applications, promoting practical problem-solving skills.

Core Concepts Covered: A primer would typically cover essential concepts like variables, basic operations, data entry and display (e.g., matrices), control flow (loops and conditional statements), and function definition, providing a foundational understanding of MATLAB programming.

Conclusion

The FDP provided valuable insights into the latest trends and technologies in MATLAB, equipping participants with the knowledge to foster future research and development in their institutions. The involvement of a distinguished Professor Dr.E.Vargil Kumar added immense value to the program, making it an enriching experience for all attendees.

Acknowledgments

The success of the FDP would not have been possible without the active participation of the 200 faculty members and the support from the organizing committee. Special thanks to Dr.E.Vargil Kumar for his expert guidance and for taking the time to share his knowledge.

About MRCE

Malla Reddy College of Engineering the jewel in the crown of Malla Reddy Group of Institutions (MRGI) was established in the year 2005 with the approval from AICTE, permanent affiliation to JNTUH, accredited by NBA & NAAC. The college is located at Maisammaguda, Dhulapally, Secunderabad, Telangana, India.

The institute offers B. Tech courses in Computer Science & Engineering, CSE(Data Science), CSE(Artificial intelligence & Machine Learning) and ECE branches. Malla Reddy College of Engineering has been laid upon a very strong foundation and has ever since been excelling in every aspect. The bricks of this able institute are certainly the adept management, the feaxcpuelrtiye, nctehde selfless non-teaching staff and of course the students.

Vision of Institute

To emerge as a Center of Excellence for producing professionals who shall be the leaders in technology innovation, entrepreneurship, management and in turn contribute for advancement of society and humankind.

Mission of Institute

To provide an environment of learning in emerging technologies.

To nurture a state of art teaching learning process and R&D culture.

To foster networking with Alumni, Industry, Institutes of repute and other stakeholders for effective interaction.

To practice and promote high standards of ethical values through societal commitment.

About the department of Humanities & Sciences(MRCE)

The Department of Humanities and Sciences (H&S) is one of the earliest Departments at MRCE established in the year 2005. The Department of Humanities and Sciences (H&S) offers basic Engineering Mathematics, Physics, Chemistry

and English among others subjects for U.G students of all B. Tech courses at first year level. The Department of H&S aims at encouraging advanced teaching learning process and quality research at individual, department, and institutional level.

It also persistently strives to build quality-based knowledge and human resource capacity, to conduct academic programs every time and again in the emerging areas of engineering and technology.

The Department of H&S is continuously working to provide a foundation for engineering studies and communication skills. We have well experienced and qualified Faculty members as per the AICTE, Delhi and JNTU, Hyderabad requirements.

Dear Sir,

We, Malla Reddy College of Engineering, are planning to conduct a One day National level Maths online Faculty development program on "MATLAB Programming- A Primer" over a virtual platform- Google meet, on 24th July 2025 Thursday at 10:00 AM to 12:00 PM.

In this regard we would like to invite you as a Resource Person for this FDP program, to give insight and professional expertise to all attending faculty members.

Kindly accept our invitation and confirm the same.

Thanking you sir.

MAISAMMAGUDA, HYDERABAD, TELANGANA.

RESOURCE PERSON PROFILE

Dr. E. Vargil Kumar,
Associate Professor
Dept. of Electrical & Electronics Engineering
Gudlavalleru Engineering College,
Gudlavalleru, A.P.

Dr. E. Vargil Kumar serves as an Associate Professor at SR Gudlavalleru Engineering College. He obtained his Ph.D. from IIT Delhi, specializing in the domain of power electronics. His research interests encompass Isolated DC grids and Hybrid DC converters. With over two decades of pedagogical experience, he has authored approximately 50 scholarly articles in esteemed national and international journals.

Objectives : To equip educators with the skills to integrate MATLAB into their teaching and research, enhancing their ability to teach computational skills, analyze scientific phenomena, and develop innovative methods.

MALLA REDDY COLLEGE OF ENGINEERING

MAISAMMAGUDA, HYDERABAD, TELANGANA.

Certificates:

Department of Humanities and Sciences (Mathematics), 24th July 2025, Malla Reddy College of Engineering, Hyderabad

“MATLAB Programming - A Primer”

MALLA REDDY COLLEGE OF ENGINEERING

(Approved by AICTE-New Delhi, Affiliated to JNTUH-Hyderabad,
Accredited by NBA) Maisammaguda, Dhulapally, post via
Kompally, Secunderabad - 500100

CERTIFICATE OF PARTICIPATION

THIS IS TO CERTIFY THAT

Chebolu Vamsi Vardhini

Vignan Institute of engineering for women

Has actively participated in the One Day online National level Mathematics Faculty
Development Program on “**MATLAB Programming-A Primer**” conducted on 24th July 2025.

OUTCOME OF THE PROGRAMME :

A structured introduction to MATLAB equips faculty with skills that are immediately applicable in the classroom and the laboratory. The learning curve, centered on 10 foundational examples, demonstrates a progression from basic syntax to advanced applications. Effortless Transition from Notation to Computation: MATLAB's syntax is remarkably close to standard mathematical notation. Faculty can quickly translate concepts like matrix operations and linear systems ($A * B$, $A \setminus b$) from the blackboard into executable code, making it an intuitive tool for both personal use and live student demonstrations.

Dynamic Visualization for Abstract Concepts: Faculty can move beyond static textbook figures. They learn to instantly generate insightful 2D and 3D plots (plot, surf, contour) to visualize functions, explore surfaces, and animate processes. This transforms abstract calculus and analysis concepts into tangible, interactive learning experiences. Bridging Pure and Applied Mathematics: The Symbolic Math Toolbox allows faculty to perform calculus operations (diff, int) and simplify expressions (simplify) with exact analytical results. This can be seamlessly combined with numerical methods to solve problems that lack analytical solutions, perfectly illustrating the relationship between theoretical and computational mathematics.

Solving Real-World Problems: Competence in solving Ordinary Differential Equations (ode45) empowers faculty to model and simulate dynamic systems from physics, engineering, and biology. This capability is crucial for both advanced teaching and for conducting research that is publishable in high-impact venues like IEEE journals. Empowering Data-Driven Research: Modern research is often data-intensive. MATLAB provides a robust suite of tools for numerical analysis, including integration (integral), interpolation (interp1), and curve fitting (polyfit). These tools enable faculty to analyze experimental data, develop models, and validate hypotheses efficiently. Automating Tasks and Creating Custom Tools: By learning basic scripting and functions, faculty can automate repetitive tasks like grading assignments or generating customized problem sets. More advanced users can develop their own interactive applications and teaching modules, creating a unique and effective learning environment for their students.
